Pigging system for hoses

AB6 Pig

Automated system

The **AB6'FLEX** allows you to **drastically** reduce your cleaning time by scraping the viscous product quickly. Ergonomic and automated, it will simplify daily tasks for your operators in the cleaning process. Ideally designed for lotions, emulsions, creams and shampoos, make-up, jams and fillings, The **AB6'FLEX** scrapes all your viscous fluids in record time!

AB6'FLEX

By Abscisse

Optimise your
cleaning processes
in complete safety

OPTIMIZATION

- Cost reduction in the cleaning of your production equipment.
- Reduced downtime for your hoses
- Recovery of residual effluent volumes
- Compact and mobile solution
- Simultaneous hose cleaning with our solution Multi-hose

ERGONOMICS

- Easy hoses handling
- Easy to use
- Automated and secure system
- Reduction of musculoskeletal disorders
- Supervision panel
- Détection of hose connection(s)

RAPID RETURN ON INVESTMENT

- Pigging time of your hose < 5min
- Single or multi-flex system
- Reduction in water consumption
- Low energy requirement
- Low maintenance cost
- Help in calculating the return on investment

TECHNICAL DATA

- 316L (1.4404)
- For any hose length from 1 to 5m
- From ND25 to ND100
- Hose connection with SMS/CLAMP or DIN fitting
- Water or air push
- Assembled, wired and tested in the workshop.
