

PUMP REMANUFACTURING PROGRAM

Based on end user requirements, Ampco has expanded its manufacturing services. Remanufacturing a used pump is a significantly lower-cost alternative to purchasing a new replacement pump. This program will restore your **Waukesha Universal I and II series style pumps** (from 006 to the 520) and the **WFT [Wrightflow] TRA10 /TRA20** to their original performance and efficiency. Ampco pumps offer complete interchangeability, superior quality and reliability.

Advantages

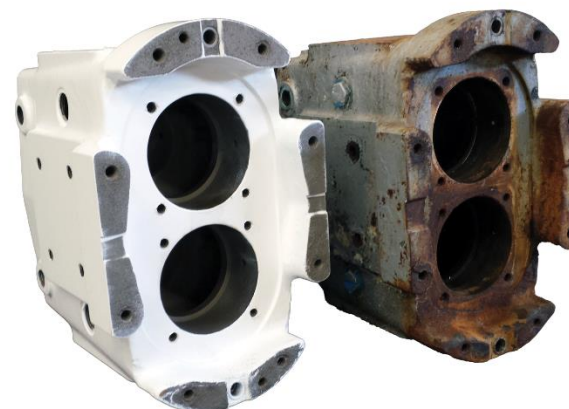

- Remanufacturing can be performed multiple times depending on wear
- **Two locations for faster turnaround and reduced shipping costs**
- Can be upgraded to Ampco's PATENTED front-loading seal design
- Helical Gears
- Shafts up-graded to 17.4ph
- Stainless steel bearing retainers
- Powder coated finish on painted gear cases

Complete Remanufacturing

- Remachine housing and cover to accomodate oversized rotors
- Reconditioned cast iron gear cases include powder coat finish
- Replace all internal parts including rotors, shafts, bearings, bearing retainers, gears, jam nuts, seals & elastomers
- Pumps are performance tested before shipping
- **One-year same as new warranty**
- **Costs 30% less than a new pump**
